Three New Seminars Provide Powerful Instructional Strategies For Your Educators!

Every educator knows students can learn more effectively and more efficiently in the right environment and with the right motivation. Now, Renaissance Learning is offering three new seminars designed to show your teachers how to help their students overcome the learning obstacles that are keeping them from reaching their true potential. Don’t miss these great opportunities for key members of your staff to walk away with concrete ideas and specific tactics they can use in their classroom the very next day!

1. Close the Achievement Gap

Participants in the Achievement Gap seminar will explore numerous effective strategies used by schools that are getting positive results in student achievement for all learners. In this highly interactive and energized session, your educators will learn concepts that target measurable improvement for all students.

2. Literacy Matters

Tying together vocabulary, fluency, and comprehension, and built on a foundation of research-based best practices, this session is designed to introduce your K–12 teachers to simple and effective strategies that foster reading and writing in their classrooms. Practical approaches will be presented that your teachers can use across all content areas to build reading mastery and writing proficiency.

3. Differentiated Learning

Facilitating differentiated instruction is about a strong instructional diversity. Your teachers must be ready with an assortment of teaching tools and techniques to meet the various learning needs of students. Differentiation is about change, challenge, and choice in today’s classroom! In this session, your educators will learn some of the simplest and best ways to differentiate learning.

Please check back for upcoming dates and locations or call (800) 338-4204 to learn how to bring one of these seminars to your site.
